

CRAFT YOUR OWN ENRICHED YR 9 LEARNING PATHWAY

click the headings to read more

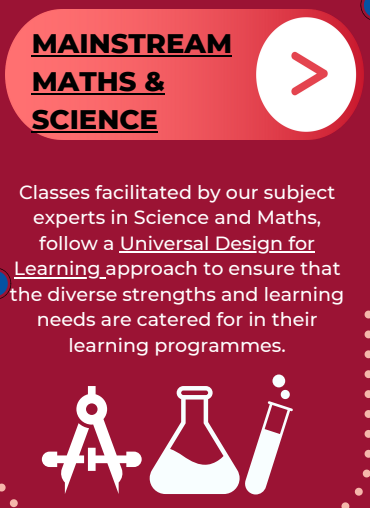

CORE SUBJECTS

Classes facilitated by our subject experts in English, Social Studies, and PE & Health, follow a Universal Design for Learning approach to ensure that the diverse strengths and learning needs are catered for in their learning programmes.

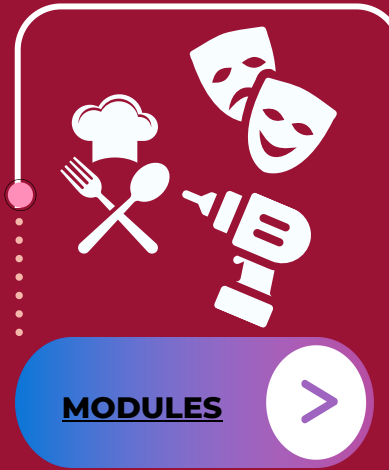

ACCELERATED MATHS & SCIENCE

Students who have particular strengths in Maths & Science will learn these two subjects as a separate group in order to make the most of extension opportunities beyond the mainstream curriculum level

MAINSTREAM MATHS & SCIENCE

Classes facilitated by our subject experts in Science and Maths, follow a Universal Design for Learning approach to ensure that the diverse strengths and learning needs are catered for in their learning programmes.

MODULES

In years 9 & 10, students choose 6 module courses in their areas of strength, passion and interest. Students on an Enrichment pathway will take 5+ either IOS or Launch

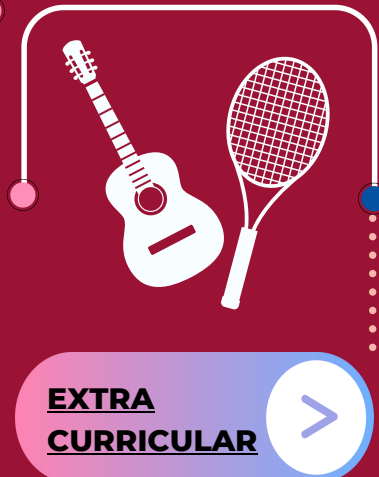

INSITUTE OF SPORT

The Nayland College Institute of Sport (IOS) aims to build successful, well-rounded people, not just successful athletes. The programme involves goal setting, athlete & team development, principles & methods of training, skill development, hydration and sports nutrition.

LAUNCH

Students who have been identified through our Enrichment Programme assessment session and / or via our Gifted & Talented identification process will be invited to take part in Launch - our project based learning module.

EXTRA CURRICULAR

We also have an extensive range of extra-curricular opportunities available to all students to support them in the pursuit of their special interests, passions and gifts.
